

AMAN RAJ

Software Engineer | Data & BI | Power BI | AI-Powered Migration
aman.raj.sde@gmail.com | +91-9430427995 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

Professional Summary

Software Engineer with 1+ year of experience in **Business Intelligence, Power BI, Microsoft Fabric, SQL, data modeling, and AI-powered analytics solutions**. Experienced in developing **Tableau-to-Power BI migration solutions** covering workbook analysis, metadata extraction, semantic model generation, validation, and report comparison. Strong hands-on experience with **Power BI, DAX, Power Query, Microsoft Fabric, SQL, Python, FastAPI, Azure OpenAI, LLMs, and PBIP**, with automation reducing manual migration effort by **60–70%**.

Experience

Software Engineer

Sep 2025 – Present

MAQ Software

- Developed enterprise **Power BI reports and semantic models** using **DAX, Power Query, SQL, Star Schema, relationships, measures, calculated columns, and data visualization**.
- Improved Power BI report performance by approximately **33%** through DAX and Power Query optimization and reduced dataset refresh time by approximately **43%** using **Incremental Refresh**.
- Worked with **Microsoft Fabric Lakehouse, Data Warehouse, and Delta Lake** to ingest and transform data from multiple sources for enterprise BI reporting.
- Converted data into **Parquet** format and designed **Star Schema** models by separating fact and dimension tables to improve data organization and query performance.
- Created and optimized **Microsoft Fabric semantic models** with relationships, measures, filters, and data transformations for scalable Power BI reporting.
- Implemented enterprise Power BI capabilities including **RLS, bookmarks, page navigation, drill-through, and visual interactions**.
- Developed an AI-powered **Tableau-to-Power BI migration platform** using **Python, FastAPI, Azure OpenAI, LLMs, and PBIP**.
- Automated **Tableau workbook analysis, metadata extraction, batch migration, screenshot generation, report comparison, validation, and PBIP generation**, reducing manual migration effort by approximately **60–70%**.
- Reverse-engineered Tableau dashboards, worksheets, data sources, calculated fields, filters, parameters, actions, and dependencies to map source business logic into Power BI reports and semantic models.
- Merged multiple **PBIP components** into unified Power BI reports, reducing developer integration effort by approximately **30%** and streamlining migration workflows.
- Integrated **Microsoft Fabric workspaces with GitHub** for PBIP source control and version management, reducing maintenance effort by approximately **40%** by enabling rollback and reuse of previous work instead of rebuilding reports after failures.
- Implemented dynamic LLM model selection and orchestration, reducing **LLM token consumption by approximately 30%** during migration workflows.
- Collaborated with **cross-functional engineering and BI teams** to develop, test, debug, and integrate migration workflows and enterprise reporting solutions.
- Performed **functional, data, visual, and UI/UX validation** of migrated reports to identify discrepancies between Tableau source reports and Power BI outputs.

Technical Skills

BI & Analytics	Power BI, Tableau, Microsoft Fabric, Semantic Models, Data Modeling, Data Visualization
Power BI	DAX, Power Query (M), PBIP, RLS, Bookmarks, Drill-through, Page Navigation, Incremental Refresh
Fabric & Data	Lakehouse, Data Warehouse, Delta Lake, Parquet, Star Schema, ETL/ELT, Data Transformation
AI / LLM	Azure OpenAI, Agentic AI, LLM Orchestration, AI Agents, Prompt Engineering
Programming	Python, Java, JavaScript, SQL
Engineering	FastAPI, React.js, REST APIs, Git, GitHub, Postman

Projects

Real-Time Chat App

[GitHub](#) [Live Demo](#)

React.js, Zustand, Context API, Socket.io, Node.js, Express.js, MongoDB, JWT

- Built a full-stack **real-time chat application** with secure authentication and socket-based communication.
- Implemented **Zustand and Context API** for state management and **Socket.io** for real-time messaging and online/offline user status.
- Developed REST APIs for authentication, registration, and user management using **Node.js, Express.js, MongoDB, JWT, and bcrypt**.

Education

B.Tech, Computer Science and Engineering

2022 – 2026

Galgotias University

Certifications

Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)
